

CAREER PROFILE

A data scientist with a versatile background and a strong interest in social and behavioural sciences, finance, artificial intelligence and social good. Experience with project management, data dashboards, consultancy, machine learning and academic writing.

EXPERIENCES

Research intern

Jun 2018 - Aug 2018

Cortical.io, Vienna

Investigated the application of Cortical.io's core technologies to finance & investing. Focused on:

- Gaining an in-depth understanding of Cortical.io's technology and its application to large, textual datasets.
- Develop methods to process, store and query news articles using Cortical.io's semantic folding technology
- Use these methods to develop a prototype for visualizing and downloading historical and live data representing the nature and quantity of news relevant to user-selected stocks, commodities and portfolios.
- Serving as liaison between the research team led by Prof. David Stolin and Cortical.

Data Analyst

Mar 2015 - Feb 2017

Leiden University Center for Innovation, The Hague

Data analyst at the Leiden Center for Innovation, Online Learning Lab (OLL). The OLL facilitates the development of Massive Open Online Courses (MOOCs) at Leiden University. I was responsible for retrieving, storing and analysing MOOC data with the aim of improving courses and providing feedback to content creators & academics. Co-published several academic articles with researchers and published open-source tools for analysing MOOC data."

Assistant Strategic Analyst (Internship Program)

Oct 2014 - Feb 2015

The Hague Centre for Strategic Studies, The Hague

The HCSS helps governments, non-governmental organisations and the private sector to anticipate the challenges of the future with practical policy solutions and advice. While at the HCSS, I worked on several projects in areas of Big Data, security studies, and international development. Further set up an event-monitoring server that scraped and processed roughly 20.000-50.000 news articles each day, and created a package in R to analyze assertive behaviour among 'great powers' such as Russia, the United States and China.
